RESIDENCY VERIFICATION AFFIDAVIT

According to State Attorney General Opinion No. 5925, school districts have the right to verify a student's residency. By signing this affidavit, you are affirming that the address given on all enrollment forms is the legal residence of the parent/guardian enrolling the student and is the residence of the student.

Should the district learn that this is not the student's residence and that the parent lives outside the boundaries of the Hopkins Public School District, a release form from the district of residence must be provided (unless the student is an approved schools of choice student) or the student may be excluded from the district.

Consent for Disclosure of Immunization Information to Local and State Health Departments

Immunizations are an important part of keeping our children healthy. Schools and State and Local health departments must monitor immunization levels to ensure that all communities are protected from potentially life-threatening diseases and, if necessary, respond promptly to an emerging public health threat. It is important that disease threats be minimized through the monitoring of students being immunized.

Sharing immunization and personally identifiable information including the students' name, Date of Birth, gender, and address with local and state health departments will help to keep your child safe from vaccine preventable diseases. The Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. § 1232g, requires written parental consent before personally identifiable information from your child's education records is disclosed to the health department. If your child is 18 or over, he or she is an "eligible student" and must provide consent for disclosures of information from his or her education records.

You may withdraw your consent to share this information in writing at any time.

I authorize Hopkins Public Schools to release my child's immunization record to the Michigan Department of Health and Human Services and Local Health Department. I understand this information will be used to improve the quality and timeliness of immunization services and to help schools comply with Michigan Law. This includes any immunization information and limited personally identifiable information from the school.

PARENT & ATHLETE CONCUSSION INFORMATION SHEET

WHAT IS A CONCUSSION?

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow, or jolt to the head or body that causes the head and brain to move quickly back and forth. Even a "ding," "getting your bell rung," or what seems to be a mild bump or blow to the head can be serious.

WHAT ARE THE SIGNS AND SYMPTOMS OF CONCUSSION?

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports one or more symptoms of concussion after a bump, blow, or jolt to the head or body, s/he should be kept out of play the day of the injury. The athlete should only return to play with permission from a health care professional experienced in evaluating for concussion.

SYMPTOMS REPORTED BY ATHLETE:

- Headache or "pressure" in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Sensitivity to light
- Sensitivity to noise
- Feeling sluggish, hazy, foggy, or groggy
- Concentration or memory problems
- Confusion
- Just not "feeling right" or is "feeling down"

SIGNS OBSERVED BY COACHING STAFF:

- Appears dazed or stunned
- Is confused about assignment or position
- Forgets an instruction
- Is unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Loses consciousness (even briefly)
- Shows mood, behavior, or personality changes
- Can't recall events prior to hit or fall
- Can't recall events after hit or fall

DID YOU KNOW?

- Most concussions occur without loss of consciousness.
- Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion.
- Young children and teens are more likely to get a concussion and take longer to recover than adults.

GAME THAN THE WHOLE
SEASON"**

CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless, or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

1. If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play.
2. Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, and playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.
3. Remember: Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. They can even be fatal.
